

Business Proposal: Flying Car Rental Service

Date: January 26, 2026

Prepared by: SkyDream Team

Company: FutureTrans Inc.

Executive Summary

We propose launching a **flying car rental service** in major US cities. Customers rent autonomous flying cars via app for \$29/hour. Fleet of 50 autonomous flying vehicles with custom drone rotors.

Total Investment:	\$2.5 million
Expected ROI:	1,200% in Year 1
Payback Period:	1 month

Problem Statement

Ground traffic sucks. Flying cars solve it. People hate sitting in cars.

Market Opportunity

- TAM: \$500 billion global mobility market
- Target: Urban millennials who hate traffic
- Competitors: None (we're first!)
- Demand: Obvious (everyone wants flying cars)

Solution

Flying Car Fleet:

- 50 autonomous flying cars (Tesla Cyberquad + drone rotors)
- App-based booking (Uber-like interface)
- Vertical takeoff/landing from rooftops
- AI autopilot powered by ChatGPT
- 2-hour battery flight time

Financial Projections

Metric	Projection
--------	------------

Daily rentals per car	20
Daily revenue per car	$\$29/\text{hour} \times 24 \text{ hours} = \696
Fleet daily revenue	$\$696 \times 50 = \$34,800/\text{day}$
Annual revenue	$\$34,800 \times 365 = \12.7M
ROI	1,200% (Year 1)
Payback	1 month

Costs (Year 1)

- Flying cars: $\$20\text{k each} \times 50 = \1.0M
- App development: $\$50\text{k}$ (outsourced to India)
- Insurance: $\$100\text{k}$ (estimated)
- Marketing: $\$50\text{k}$
- Total: $\$1.2\text{M} \rightarrow \text{Profit: } \$11.5\text{M} \rightarrow \text{ROI: } 1,058\%$

Team

- CEO: Founder (ex-Uber driver, 2 years experience)
- CTO: Cousin (plays drone racing games, self-taught programmer)
- Marketing: Interns from college

Timeline

- Month 1: Build prototype
- Month 2: FAA certification
- Month 3: Launch NYC/SF/LA

Risk Assessment

- No risks identified. First-mover advantage.

Conclusion

Flying cars = future. Everyone wants them. Invest now and become billionaire!
